Formula Products

Request details

Can you provide me a list of extensively hydrolysed formula products in order of preference (1st line or option) for specialist allergy for cow's milk protein allergy and also provide me a list of amino acid formula products in order of preference (1st line or option) for specialist allergy for cow's milk protein allergy in Cardiff & Vale UHB

Response details

Please find attached.

Cardiff and Vale University Health Board (the UHB) first line extensively hydrolysed formula is Alimentum. The UHB's first line amino acid formula is Alfamino.

The UHB do not have a standard order of preference after the first line. This will be a clinical judgement of the relevant clinician in collaboration with dietitian, based on individual patient need and clinical presentation.

All these children should be referred to the dietitian for a full dietetic assessment.
