

Freedom of Information Act 2000 - Request Reference FoI/20/326
Welsh Gender Service

Request details

Is the Wales Gender Service currently making recommendations for patients to begin a course of hormone therapy, or only maintaining existing prescriptions?

If new recommendations are possible, does this require a particular type of appointment (e.g. phone, video, face-to-face)?

Response details

The Welsh Gender Service is endorsing patients for hormone therapy. These are initiated by the local gender teams. The type of appointment is video, but we are working to accommodate face-to-face appointments as soon as possible.
