

Freedom of Information Act 2000 - Request Reference FoI/21/206
Congenital Diaphragmatic Hernia

Request details

- 1. I would like to know how many cases of Congenital Diaphragmatic Hernia have been missed at 20 week anomaly ultrasound scans and subsequently been discovered after birth.**

Please find attached. This is information from the Congenital Anomaly Register & Information Service for Wales (CARIS). Small numbers generally prevents CARIS from sharing numbers at a unit level.

- 2. I would like to know what measures have been put in place to deal with cases of undetected defects such as CDH.**
 - Each case is reviewed by the Lead Sonographer and / or the Consultant Radiologist and the Sonographers' who have undertaken the ultrasound scans.
 - Identified Educational or Technique issues are addressed.
 - Cases logged with the Radiology department Governance lead.
