

**Freedom of Information Act 2000 - Request Reference FoI/22/386**  
**Primary Care Pathway for Lower GI**

**Information requested:**

Do you have a clear pathway in primary care for the investigation of non-cancer related lower gastrointestinal symptoms that include the use of faecal calprotectin tests? If so, I would appreciate if you are able to share any details you may have.

**Response details:**

Cardiff and Vale University Health Board (the UHB) does not hold this information. The UHB can advise that it does not have a 'non-cancer pathway for lower GI symptoms'.
