Delivery unit statistics

Information Requested:

I understand the health board is now reporting delayed transfer of care statistics to the 'Delivery Unit', which is then publishing a summary of DTOC information on the Welsh Government website on a monthly basis here: <https://www.gov.wales/nhs-activity-and-performance-summary-may-and-june-2023>

Please could you provide me with updated data on waiting times (i.e. how long patients who are clinically optimised/medically fit for discharge have been waiting).

My understanding is that the DTOC figures referred to above are based on a sample from the 3rd Wednesday of the month, or a similar 'snapshot' method.

Based on those samples, and the returns given to the delivery unit, for each month between April and July, please could you tell me how many patients were waiting:

1. 0-1 months
2. 1-3 months
3. 3-6 months
4. 6-12 months
5. Over 12 months
