

# Permits to Work

There are several high-risk activities that require permit to work, typically:

- Permits will be issued by the Supervising Officer for ..
  - Electrical works
  - Medical gas systems
  - Hot works
  - Working at height
  - Working on ventilation systems
  - Excavation work
  - Confined space
  - Asbestos
  - Steam
- Undertaking these work type without a permit is a serious breach of UHB contractor procedures.
