Dragons Heart Hospital

Request Details

I am seeking information about how much was paid to the Principality Stadium in Cardiff in order to occupy it as a field hospital.

I understand the contract between the Health Board and the Principality Stadium is complex, but can you break it down and tell me how much has been either agreed or paid to the stadium for the lease/rent/licence to use the facility as a field hospital to the current date, between March 2020 and January 2021.

I am not interested in build costs, or decommissioning costs, but merely the amount agreed to use the facility.

If this is on a rate per day/week/month basis, please can you tell me that if the first figure I asked for is not available.

Response Details

Cardiff and Vale University Health Board have not paid rent to the WRU but entered into a detailed contract to meet the operational costs of the use of the stadium. The Dragon's Heart Hospital total revenue costs are assessed at £59.442m with a further £2.698m capital costs.
