Dear [~PAT.PAT TITLE/M~] [~PAT.SURNAME/M~]

I am writing to inform you that the screening test you had for Down's syndrome showed you have a low chance of your baby having Down's syndrome.

This does not mean there is no chance of you having a baby with Down's syndrome, but the chance of this happening is low. No further tests are recommended.

Information about Down's syndrome screening results is in the "information for women" pack and on www.antenatalscreening.org

If you would like further information your midwife can explain the results to you at your next antenatal clinic visit.

Please keep this report with your maternity notes so that your midwife will see this information.

Yours sincerely

Antenatal Clinic Midwife
