

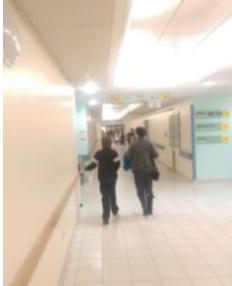

Photo Directions to Clinical Neurophysiology (UHW)

Upon entering concourse continue to the stairs just past the reception desk. Should you be unable to climb the stairs, lifts can be found just to the left of the stairs which will bring you to the same area.

Once you've gotten up these stairs or the lift, you should see the following corridor in front of you.

Walk forward, passing x-ray on your right and Radio Glamorgan on your left (pictured below) until you reach a set of 6 lifts; Press to go UP and to the 4TH floor.

When you exit the lift, walk to the corridor. Turn right and walk past the stairs and an office. You should see the following signs in front and above you, and the entrance to Clinical Neurophysiology on your right

Enter through these double doors, and talk to our friendly staff at the reception, who will note your attendance.
