

CPR

What is **CPR**?

CPR stands for...

Cardiopulmonary Resuscitation

This book will try and help you understand about **CPR**

CPR

What is CPR?
What does it
mean?

If your heart stops
beating...

CPR will TRY
and get it
going again

This will be done by doing some of these things...

Pushing down on
your chest lots of
times

Using a
Defibrillator...
this is using
electric pads on
you

Using a mask or
tube to help you
breathe

Or injections

These are only used in an emergency

CPR is only used when your heart has stopped

CPR is separate and different to medical help you already get

Talking about CPR

You might need to talk about whether CPR is right for you because of an accident, an illness, or at the end of your life

Doctors

and

nurses

involved in your
care will talk to
you and help you
understand more

If you are not
ready to talk...
tell us...that's ok

We will wait until
you are ready to
talk about it

We will listen to
what YOU want

You can tell us
about your religion or
what you believe in

and what YOU
would like to
happen to you

Who decides about CPR?

These decisions made by doctors involved in your healthcare are always best made when they involve YOU, and your family or carers

We will talk about your health and how ill you are and whether CPR is the right choice for you

Will CPR work for me?

Sometimes it may work...

=

=

Sometimes it may not...

=

=

Will I be ok after CPR?

Even if CPR worked on you, you would still be very ill, and would need to stay in hospital. It may even make you more unwell

Your doctor or nurse will tell you what could happen to you and the effect that CPR may have on you

Does everybody have CPR?

NO...Not every one
has CPR tried on
them

If you are very ill and
nearly at the end of
your life...

or chosen not to have
CPR...

we would not try
CPR on you

What if I can't make a decision about CPR because of my illness or learning disability?

Someone who knows all about you will make the best decision for you

This person is called

A Legal Proxy

It may be a family member or a friend

You can choose who it is

or

A court will do it for you

What if I decide I don't want CPR?

That's ok, its your decision

You will still get all the doctor and nursing care you need

Make sure you tell people who **NEED** to know

And it is written
down

There is a form
called...

Do Not Attempt Cardiopulmonary Resuscitation

(DNACPR form)

This form will be
kept in a safe
place, your doctor or
nurse will keep a copy
and will give you a
form too, to take to
your home

The doctors will tell the people who NEED to know...

so if you are taken ill...

and might need an ambulance...

You, or your carer, should give them your form so they will know not to try CPR

Please remember you CAN talk about CPR again at any time, even if there is already a DNACPR form

If you need more help to decide

These are some people who you might want to talk to about CPR...

- A carer or somebody who helps you
- Your family or your best friend
- The doctors and nurses involved in your care
- A vicar or priest
- An advocate
- Support groups
- The NHS helpline

Everything explained in this booklet has been put into 4 leaflets...

- What is CPR?
- Talking to someone about CPR
- Will CPR work for me?
- Who decides about CPR?

You might want to read these one at a time and in your **own** time

This booklet has been devised on behalf of the All Wales DNACPR Implementation Group by:

- Tracey Jones ABUHB
- Heather Oram ABUHB
- Rachel Morgan ABUHB

With thanks to

- Caerphilly People First
