GN Making Life Sound Better

## Introduction

Danalogic GN's wireless accessories stream sound directly to your hearing devices. Our unique Wireless platform is robust, stable and direct. Unlike other Wireless systems it **doesn't** require you to wear a streaming device around the neck. Our range of accessories, combined with the technology in the Analogic GN portfolio, create a hearing system that addresses many of the problems experienced by hearing device wearers. Our 2.4GHz accessories can be added at anytime without the need for software programming.

## Micro Mic & Multi Mic

Danalogic GN's Micro Mic and Multi Mic enable you to hear more of everything. The voice of a loved one, a teacher, a colleague – whether they are in a noisy place or several metres away, you'll hear them with crystal-clear sound.

### Micro Mic Benefits

- Streams sound up to 25 metres with clear line of sight
- Up to 10 hours of talk time per battery charge
- 3-hour charge
- Discreet design
- Easy to pair
- Our 2.4GHz accessories can be added at any time without the need for software programming
- Rechargeable

### Multi Mic offers you all of the above plus:

- Up to 11 hours of talk time per battery charge
- Can also be used as a table mic, you can hear everyone around it.
- Connects to FM and Loop systems
- Has a mini-jack input for streaming audio from virtually any device with a headphone output

## Phone Clip+

Even when you're in a busy, crowded place, talking on the phone becomes effortless with the Danalogic GN's Phone Clip+. Just push the answer button and the Phone Clip+ will stream the call directly to both hearing devices. If it's too noisy, you can even block out surrounding noise to better hear your phone call. When you aren't on the phone, use the Phone Clip+ as a audio streamer and remote control.

### Benefits

- Up to 6 hours of talk time and 80 hours of standby time
- A mute button to block out all other surrounding sounds so you can concentrate on your call
- Simultaneous connection to two Bluetooth devices (such as phone and tablet)
- Easy-to-use remote control functionality for your hearing devices
- Quality stereo sound when streaming music
- Private and secure connection
- Call reject and transfer, last number dial and voice dial functions
- Rechargeable
- Charge time - 3hrs

## BeMore Smartphone App

Access the BeMore Smartphone App to discreetly control and personalise your hearing devices and wireless streamers.

### Benefits

- Quick buttons - one tap access create and save favourites
- Remote Assistance feature - send and receive fine-tuning adjustments via the app
- Geo-tag favourites for automatic programme change based on location
- Track misplaced hearing devices via the app

## Remote Control 2

For those without a smartphone with Danalogic GN's Remote Control 2, you can easily control your hearing devices\*. It's visual interface gives you a clear indication of the current volume and program settings of your hearing devices.

Overview, control and discretion – all in one.

### Benefits

- Adjust volume of hearing devices together or individually
- Change hearing device programs
- Start streaming programs and control balance of the hearing device volume and streamer volume
- Block out surround sounds completely with the mute button
- Rechargeable

\*And wireless accessories

## TV Streamer 2

With Danalogic, GN's TV Streamer 2, you can enjoy clear sound from the TV or any other audio device – at normal volume – and still participate in conversations around you.

### Benefits

- Connects directly to virtually any audio device – TVs, stereos or computers
- Delivers stereo sound directly to hearing devices without the need for any additional device around the neck
- Easy to use
- Very discreet
- More than one user at a time can connect to the same TV streamer 2
